Marketing & Promotion Analysis

Compare daily performance by business event

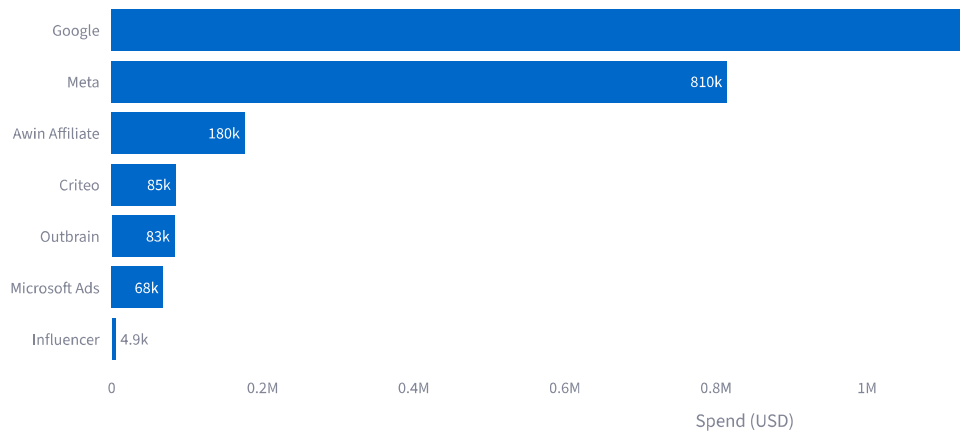

Site-wide promotion

Average Daily Revenue: Site-wide promotion

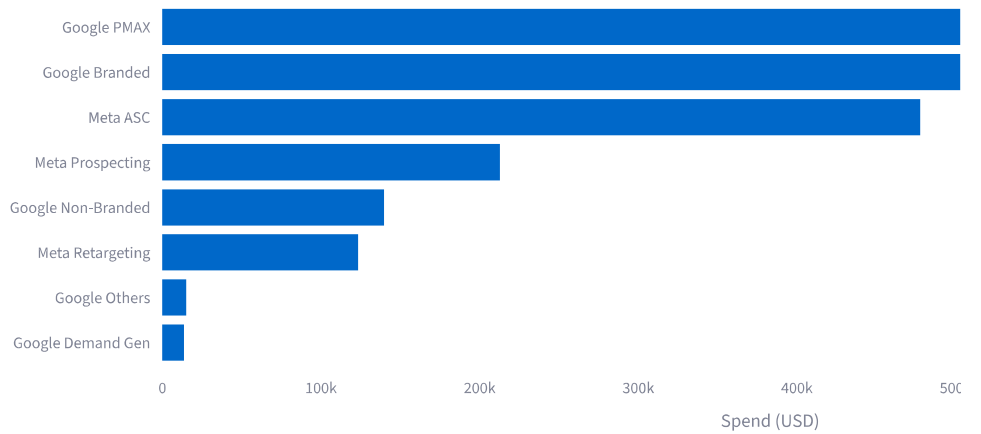

Event	Avg daily revenue	Avg new-customer revenue	Avg media spend
Yes	\$68,013	\$21,171	

Paid Media Mix

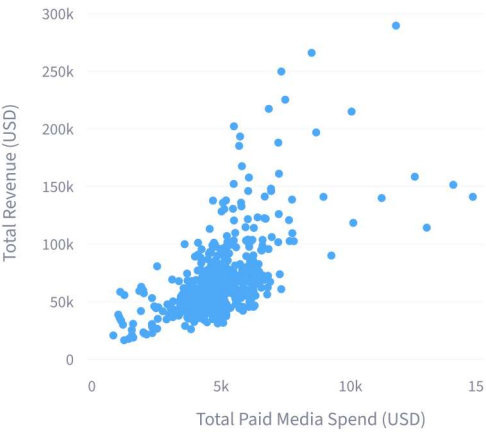

Google and Meta component mix

Platform Component Spend

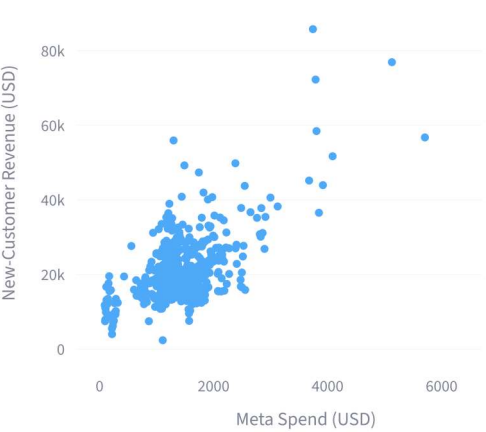

Acquisition & Efficiency

Revenue vs Total Paid Media Spend

New-Customer Revenue vs Meta Spend

Metric	Correlation_with_Revenue
Revenue_New_Customer	
Awin_spend	
Total_Media	
spend_Meta	
spend_Google	
microsoft_spend	
criteo_spend	

Correlation is descriptive, not causal. Promotions, mailings, seasonality, media spend and other factors can move together.

Data Quality & Analytical Notes

Rows	Missing values	Duplicate rows	Unique dates
572	0	0	572

Checks performed in the supplied preprocessing:

- 852 rows / 23 columns in the Master data.
- Dates run from 1 Apr 2024 to 31 Jul 2026.
- No missing values were reported.
- No duplicate rows were reported.
- Dates were converted to datetime and the expected daily date sequence was checked.
- Google and Meta roll-ups are treated as totals; their component lines are **not** added again.

Interpretation principle: this dashboard is exploratory. Differences between event days and non-event days show observed associations in the data; they should not be presented as causal effects without a stronger experimental or statistical design.
